

Environmental chemistry services

TAKE CHARGE OF YOUR SAMPLES AND DATA

From planning analytical processes and programs to assessing and validating organizational data, we focus on doing it right the first time.

Using our extensive sampling and laboratory experience, the ddms team will help you chart your course through the entire analytical program.

LET US BE YOUR NAVIGATOR

Our chemists have extensive experience in planning and executing analytical processes and interpreting data in support of environmental projects. Our team can help you develop proactive plans to steer clear of obstacles before they become issues.

HOW WE WORK

Tell us where you need to go. What decisions will you need to make with the data? How will it be used? After listening carefully and asking questions, we'll create a plan to:

- Get results that are usable and defensible for your purpose
- Collect the right samples in the right places with the right sampling methods
- Use the right methods and laboratories
- Assess the accuracy and precision, usability, and defensibility

ddms' team of experienced chemists will guide you through developing a plan to obtain usable data for every phase of your program, from project planning to data usability.

100+
projects completed

Nearly
20 YEARS
in business

100s
of years of experience

100%
of our consultants have
technical science degrees

TRUSTED PARTNER
for global clients

CONTROL AND OPTIMIZE WITH DDMS CHEMISTS BY YOUR SIDE

Planning

- QAPP/SAP preparation or review
- Laboratory selection
- Proficiency Evaluation Program
- Quality Assurance/Control Program Development
- Method selection, modification, or development

Auditing and Monitoring

- Field sampling
- Laboratory
- Ongoing PE programs

Other services

- Litigation support
- Assist laboratories with preparation for accreditation

Data review and usability

- Implementation
- Validation
- Forensics
- Data Rescue

ddms = DEPTH OF EXPERTISE + BENCH STRENGTH

We are scientists who understand environmental data from the ground to the cloud. We join your team as partners, using our expertise to help you make more insightful decisions through all aspects of your environmental compliance project.
